

# Tick immunisations off your back-to-school checklist!

"I've just been to the immunisation nurse with my brothers and sisters and we're now ready for nursery and school"

Being up-to-date with all vaccinations protects children from serious illnesses such as, measles, whooping cough and meningitis which can spread more easily in schools.

- Reduce absences from school and prevent spreading illnesses to other vulnerable family members
- Protect your child with both doses of MMR and prevent further outbreaks of measles
- Don't forget your child's nasal flu vaccine (ages 2 - 18)

**JANUARY CLINICS, WALK-IN OR BOOK AN APPOINTMENT ON 07469 351 784**

| LOCATION / CONTACT   | DAY / TIME                       |
